ABOUT ME

I am a recent Computer Engineering graduate with a passion for web and software development. With a strong foundation in programming and problem-solving, I have a solid understanding of computer systems. My personal projects have honed my skills in coding, debugging, and designing user-friendly interfaces. I am eager to leverage my knowledge and creativity in innovative projects within a forward-thinking organization.

WORK EXPERIENCE

Internship, at Wealth Management System Limited   **Sept. 2023 - Mar. 2024**

During my internship at Wealth Management System Limited, I took on the role of a web developer. My main responsibility was training in web development using the Angular framework, and I also contributed to testing the developed systems using the Robot Framework. Additionally, I gained experience in mobile application development using Flutter to create a shopping app.

Leadership

- Kasetsart University Students Council Board Chalermphrakiat   **2021 - 2022**
  Sakon Nakhon Province Campus.
- Computer Engineering Committee of Kasetsart University   **2020 - 2024**
  Chalermphrakiat Sakon Nakhon Province Campus.

Project in The course

Disease classification system of rice leaves by convolutional neural networks
- Responsible for interface design and Create a neural model
- Using Figma, Google Colab,

Arm Robot
- Responsible for programming using Arduino.

Dormitory booking website
- Responsible for interface design usimg figma

Fruit sorting system
- Responsible for programming using Arduino.

EDUCATION

Bachelor of Computer Engineering   **2020-2024**
Kasetsart University Chalermphrakiat
Sakon Nakhon Province Campus.

High school, Science Mathematics Program   **2014-2020**
Mahad Islamic School.

KEY SKILLS

- HTML
- CSS
- Flutter
- JavaScript
- TypeScript

- Angular
- React
- Bootstrap
- Git/GitHub
- Robot Framwork

Languages
- Thai
- Melayu
- English
